Design can be considered intelligent when it subtracts unnecessary elements and makes the entire structure more essential. The handle of the new Araxis collection is nothing more than the central portion of the vertical steel profile. The panel slides and, once the door is closed, the handle coincides perfectly with the upper and lower portions of the profile, fixed to the walls, so the mast is recomposed in its entirety. Enveloped in silence, thanks to the innovative Soft Close system which reduces every noise caused by the sliding panels, the new Araxis collection offers a dimension of deep relaxation.

#### SHOWER SCREEN WITH SLIDING DOOR

Clean style for this shower enclosure with sliding door. The glass panel is lit up by the essential vertical steel handle. The collection also includes **Arbatax Move**, with electronic opening system. Just press the button replace the handle, and the panel gently slides. Hush and comfortable, Arbatax Move adds a stylish luxury touch to your bathroom. Designed and built to comply with EN14428 e EN60335 safety standards, Arbatax Move simply requires a connection to low voltage (12 V) power supply, which can easily be made when the electrical system is completed. The sliding motion of the door is controlled by sensors and an electronic board that prevent fingers from being crushed, the system also release the door to be opened manually, in case of malfunction or power failure.

Light and functional design for this shower enclosure with sliding doors. Distinstive feature: the glass panels can be lifted to thoroughly clean the edge of the shower tray thus achieving a higher standard of hygiene. The small magnets positioned flush with the glass panel base, and therefore invisible, endow the enclosure with perfect watertightness.

Extensibility  $\pm$  0,8 cm from the size indicated on confirmation of the order

With Janas, Calibe interprets the pivot hinges opening. Janas, completely realized in Stainless Steel and tempered glass, is customizable according to the width of the niche. It grants the possibility to position of the pivot allowing module the inner section of the door. The handle, once the door is closed, is integrated on the vertical frame granting an absolute minimalism of the whole structure.

**SHOWER ENCLOSURE WITH PIVOT OPENING DOOR**

Made of polished or brushed finishing **Stainless Steel**  
**8 mm clear tempered glass**  
 Standard **height 200 cm**  
**Made-to-measure widths**

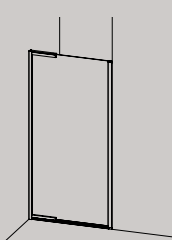

**OPTIONAL EXTRAS:**  
**Extra-clear, coloured, matt and reflective glass** is available > PAG. 154  
**Custom made heights** are available > PAG. 163

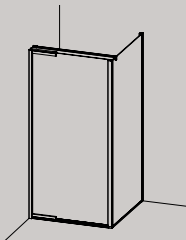

**HINGE ROTATION PIVOT WITH VARIABLE POSITIONING**

It is possible, with no additional costs, to position the hinge rotation pivot at **20, 30, 40 and 50 cm** from the wall. It is therefore possible to decide the **distance between the glass and the wall, once the doors is open.**

**DOOR**

**DOOR + FIXED SIDE**

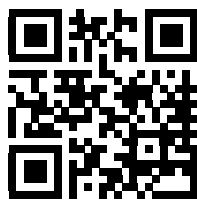

Right-handed models with handle on the right are shown. All left-handed models are also available. Non-reversible doors and cabins.

This shower enclosure is a contemporary reinterpretation of folding system, increasingly adaptable to space.  
The innovative double pin hinge enables to choose outward or inward opening.  
A perfect model for combinations with floor-level shower tray, in which it provides maximum entrance span.

Extensibility  $\pm 0,5$  cm from the size indicated on confirmation of the order

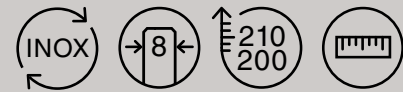

The precious crystal surfaces are punctuated by essential steel profiles. An almost evanescent volume, for a refined and discrete style. Every detail is light, minimal, graphic. The handle and hinges are also characterized by vertical design and come to form an almost single body together with the masts.

Tirso is a versatile collection, open to niche and corner compositions. All models have one single hinged door.

The standard 210 cm height ensures breathing space for every configuration.

#### SHOWER ENCLOSURE WITH OUTWARD OPENING

Made of polished or brushed finishing **Stainless Steel**

**8 mm extra-clear tempered glass**

Door with the hinges on the wall frame for a shower enclosure to suit any layout, and blend in with corner, recess, or low wall solutions. Fine lines for the steel uprights, stylishly contrasting markedly material rectangular hinges. The full height glass solutions create essential and enveloping volumes.

THE STABILIZING TIE-ROD IS NECESSARY AND INCLUDED IN THE PRICE, OTHERWISE THE "T" STABILIZING TIE-ROD MAY BE ADDED BY OUT TECHNICAL DEPARTMENT IN CERTAIN SITUATION FOR SAFETY REQUIREMENTS DEPENDING ON THE SIZE OF THE ITEM.

### NON REVERSIBLE MODEL - AVAILABLE COMBINATIONS SHOWN

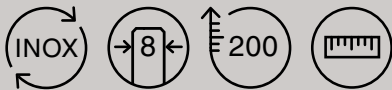

- To complete the order please specify:
- > the outer dimensions of the shower tray, and type of installation of the shower tray > **cover flap**
  - > the position (right or left) of the handle
  - > the width of the door and the fixed side if different
  - > the Stainless Steel finishing (polished or brushed)
  - > the glass (clear, extra-clear, coloured, matt, reflective) > PAG. 154

Fixed sides extensibility  $\pm$  1 cm from the size indicated on confirmation of the order

Shower enclosure with the squared hinges in this hinged door model convey the solidity of steel, in contrast with the purity of the glass. Possible solutions, recess, wall or above wall. Or even two door enclosures with two wall sides plus a fixed one, or with two doors sides and a fixed one.

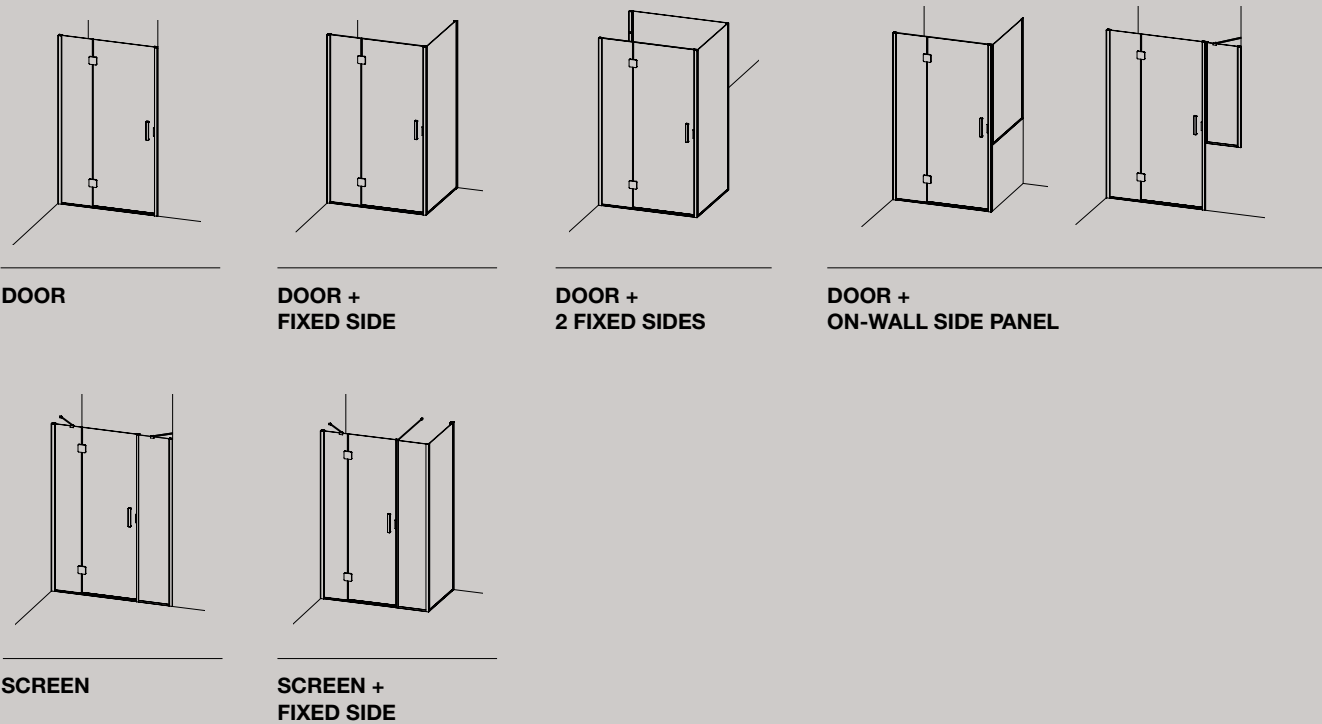

**SHOWER ENCLOSURE WITH OUTWARD OPENING**

Made of polished or brushed finishing **Stainless Steel**  
**8 mm clear tempered glass**  
 Standard **height 200 cm**  
**Made-to-measure widths**

**OPTIONAL EXTRAS:**  
**Extra-clear, coloured, matt and reflective glass** is available > PAG. 154  
**Custom made heights** are available > PAG. 163

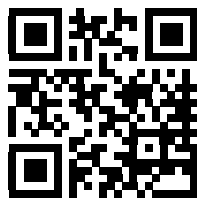

Right-handed models with handle on the right are shown. All left-handed models are also available. Non-reversible doors and cabins.

Extensibility ± 0,7 cm from the size indicated on confirmation of the order

Made with frames, knobs and hinges in stainless steel and tempered 8 mm glass, this is the ideal solution for those who need to install a cabin shower in a design-complicated environment. The possibility to decide the lengths of both door and fixed part, allow to optimise the entrance space and the inner and outer dimensions of the moving part. With internal-external opening, Silica is ideal for large showers in bathrooms with limited space.

A shower enclosure made up of simple parting walls with no barriers, for a bathroom where each element gently approaches space, without invading it, a shower enclosure pure glass and minimal wall and floor mount steel mouldings convey sheer luminosity. Straight or jointed steel tie-rods placed in the upper part of the panels ensure lasting thightness, stability, and safety.

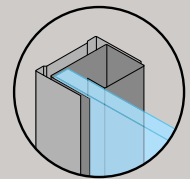

Made of polished or brushed finishing **Stainless Steel**

**8 mm clear tempered glass**

# TECHNICAL SECTION

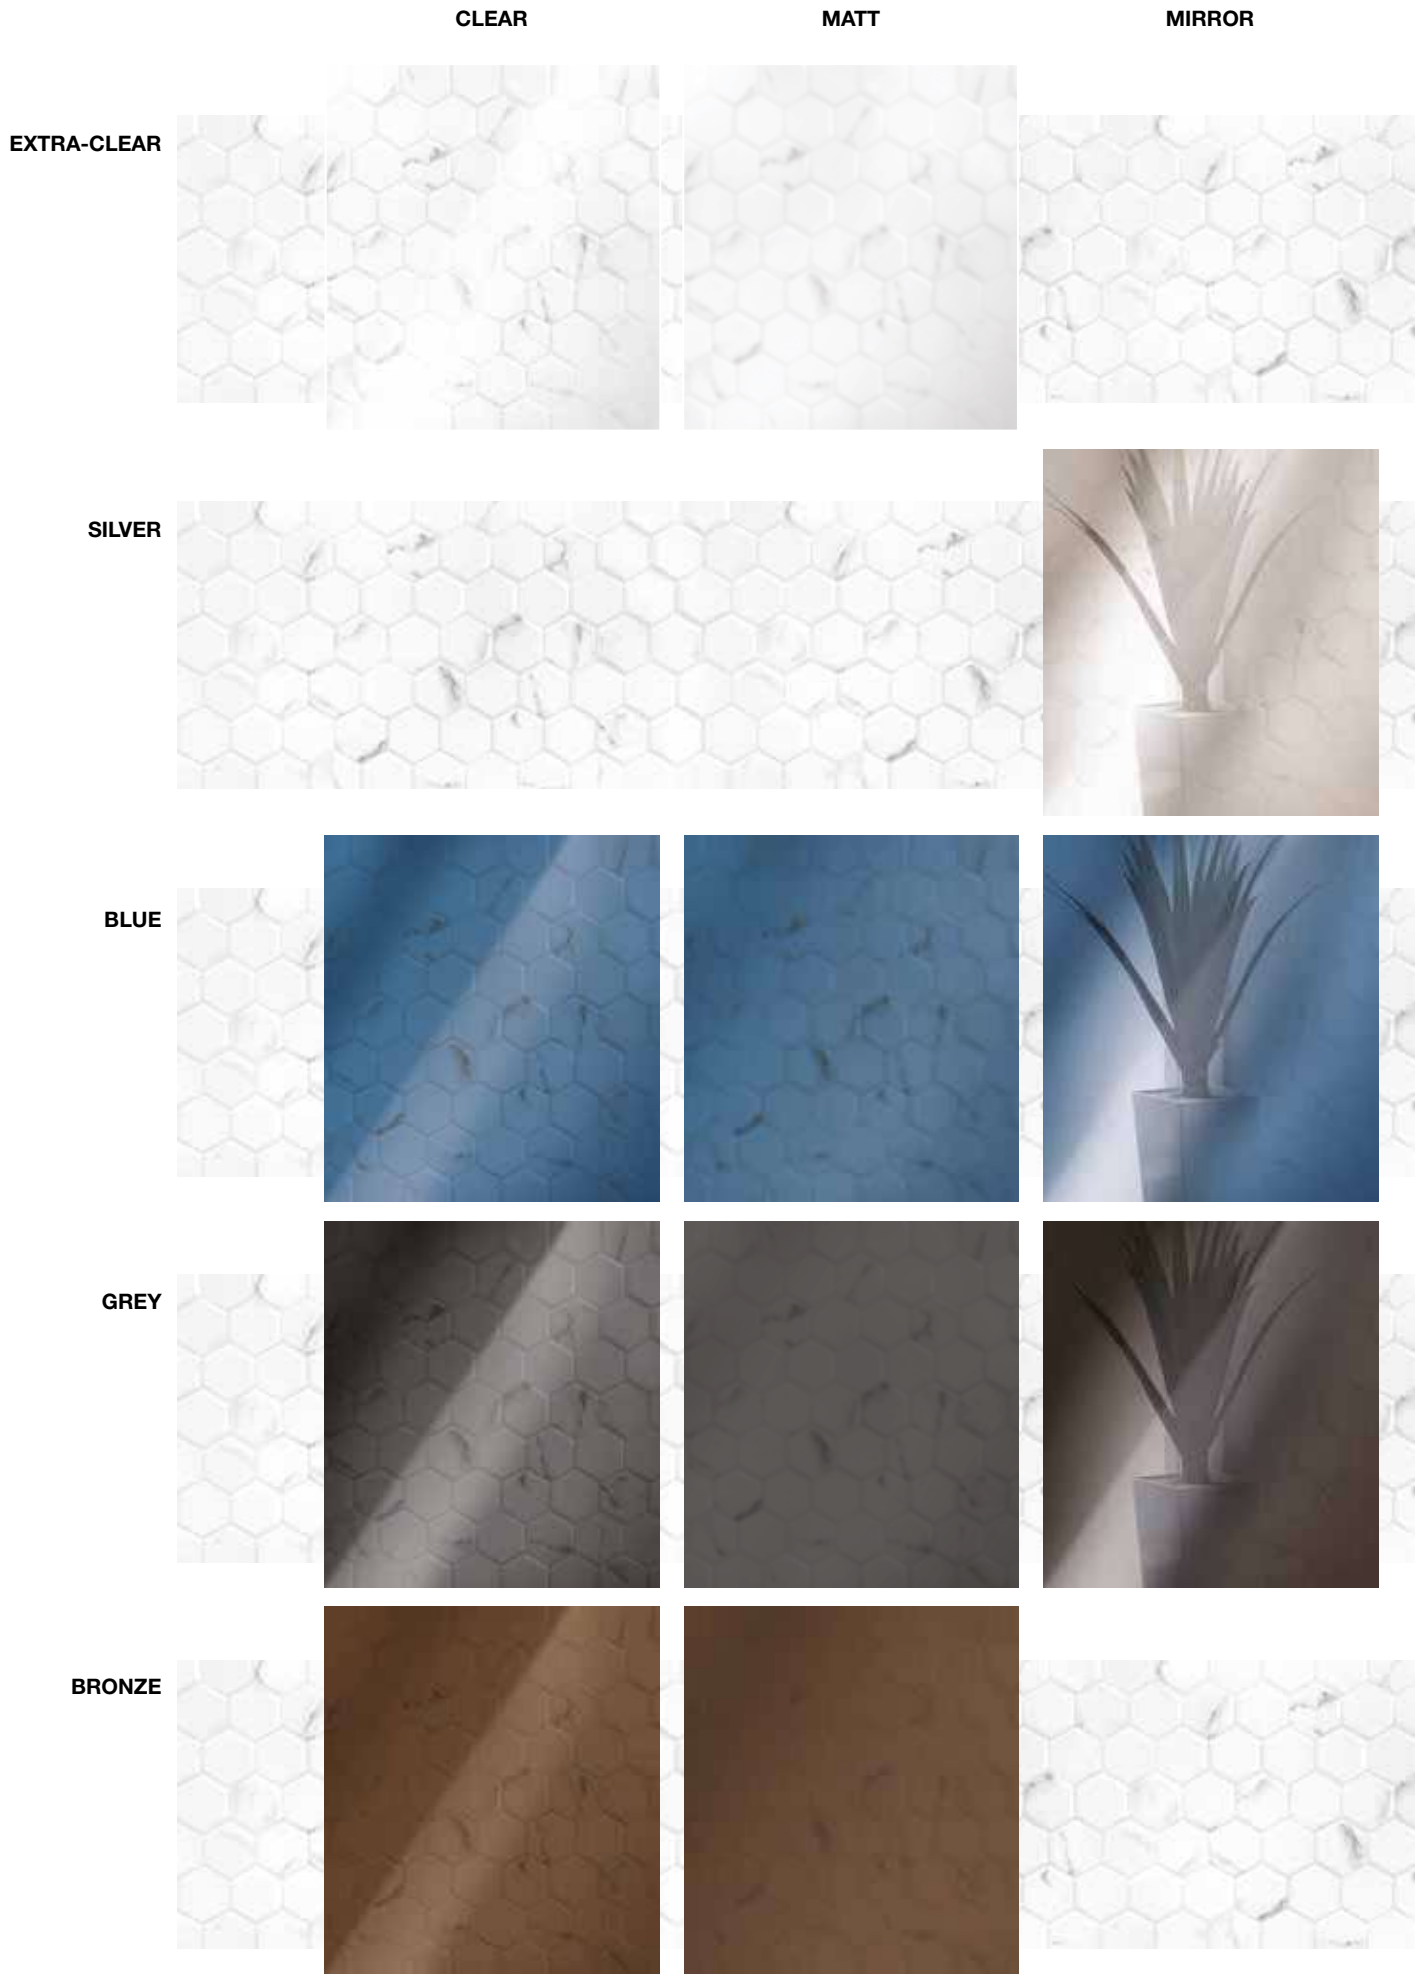

The colour, the absolute key feature in the bathroom, does not stop at the coverings but involves and envelops the shower cabin. **Silver, Blue, Grey, Bronze**, in addition to the elegant **Extra-clear**: for the first time, the shower cabin is coloured. Five different shades for three different types of glass: **Clear, Matt, reflective**. A new and revolutionary concept where colour becomes the soul of the shower cabin.

Standard extra-clear glass

- > ARBATAX, ARBATAX MOVE, CHIA, JANAS, THIESI, LINEA TRASPARENZA, BITHIA, SILIS, SOPRAVASCA, THIANA, SILICA
- > ARAXIS e TIRSO - Already supplied with standard extra-clear glass.

For **PALAU** models, only extra-clear and transparent grey glass are available.

For all **CURVED GLASS CABINS** (SILANUS and LUNA collections), only matt glass is available.

- EXTRA CHARGES TO BE APPLIED TO LIST PRICES:**
- > The extra charge is for a 130 cm width glass; for larger widths, the indicated extra charge must be doubled.
  - > To apply the same extra charge even in the case of special heights (if available).
  - > The standard matt glass (therefore not extra-clear or coloured) is available for all Calibe products.

For all CURVED GLASS CABINS (SILANUS and LUNA collections), only matt glass is available. Price shown on the page for each individual model.

The wide experience of Calibe, a company born with the mission of producing shower cabins entirely in stainless steel, allowed to produce profiles with special sections, solving problems with inclined walls, out of plumb, as well as special mounting (where normal wall attachment is not possible). Calibe requires precise measurements, drawings and data in order to provide a product that, specially created, solves even the most complicated cases in the best possible way.

# ACCESSORIES

170

ACCESSORIES

## TOWEL HOLDER

Available for the collections: LINEA TRASPARENZA, BITHIA, SILIS, PALAU, THIANA, SILICA, THIESI, ARBATAX, TIRSO, JANAS.

- > Standard width 40 cm.
- > Different widths available on request.
- > Can be positioned on the glass of the fixed side.

FINISHING	ART.
POLISHED STAINLESS STEEL	500MPS
BRUSHED STAINLESS STEEL	501MPS

## STAINLESS STEEL HANGER

Stainless steel hanger that can be installed on the 8 mm thick fixed glass (for all collections).

- > It is possible to decide the position of the hamger on the glass (both vertical and horizontal). If not specified, the hanger will be positioned at our standard.
- > Several hangers can be placed on the same glass.
- > The choice of the hanger and its position must be ordered together with the cabin, as it is not possible to add them later.

FINISHING	ART.
POLISHED STAINLESS STEEL	500GNC
BRUSHED STAINLESS STEEL	501GNC

## SOFT CLOSE

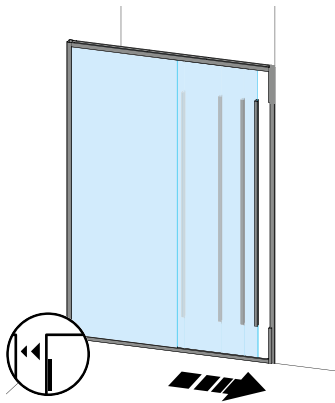

Available for ARBATAX models

Assisted closing system for models in the ARBATAX collection. Supplied as standard in the ARAXIS collection.

- > It allows “soft” closing, avoiding a violent impact from the sliding door against the frame.
- > The system is mounted inside the upper frame of the cabin and therefore is completely hidden.

IT MUST BE ORDERED AT THE SAME TIME AS THE CABIN.

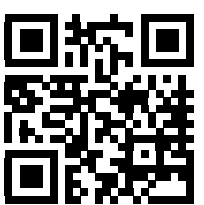

FINISHING	ART.
SOFT CLOSE	500SFC

STORAGE TRAY

# LEAK-FREE®

## LEAK-FREE® SYSTEM

Internationally patented system, unique in the bathroom market, avoid any point of contact between shower tray and cabin.

The tray and cabin elements are separated, thus preventing the accumulation of mould, bacterial charges, stagnating dirt and limestone in difficult-to-clean corners. The Leak-Free system allows cabins **to be installed without the use of silicone**, and guarantees **absolute cleanliness and hygiene**.

### SILANUS

Cabin with central sliding door

- > 91x91 cm
- > 91x74 cm right and left

### LUNA

Cabin with two inward/outward opening doors

- > 91x91 cm
- > 91x74 cm right and left

# LEAK-FREE® SYSTEM

**IMPORTANT:** TO ENSURE THE CORRECT FUNCTIONING OF PRODUCTS USING THE LEAK-FREE SYSTEM, IT IS ADVISABLE TO FOLLOW THE FOLLOWING INDICATIONS WHEN INSTALLING SHOWER TRAYS:

- > The tray must be recessed before laying the floor and coating.
- > The tiling must never cover the red adhesive strips on the shower tray of the edge of the trays.
- > It is therefore advisable to inform the installer of the thickness of the material to be used to tile the walls.

# HOW TO TAKE THE MEASURE

## Attention:

To avoid any mistakes, measurements must always be taken after floor and wall tiling.

In order to achieve a perfect installation, it is essential that the shower tray has been correctly installed and that it is perfectly leveled.

Instead, in case of edgeless or “floor level” shower tray installation, it is necessary that the correct inner slope is taken into consideration and complied with.

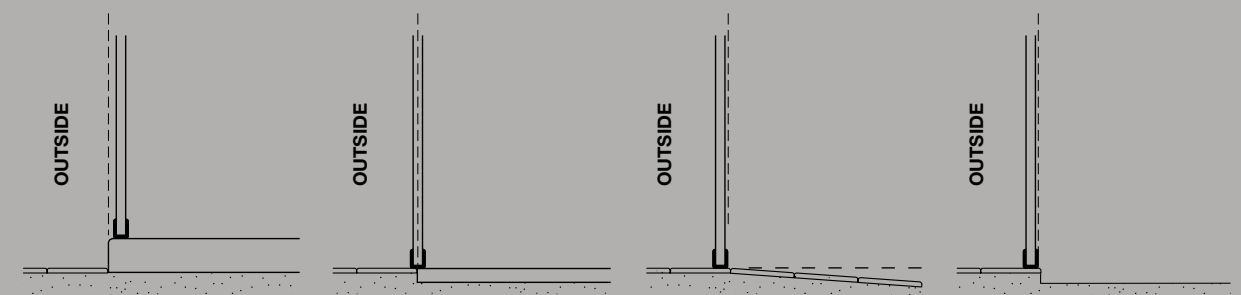

RECESS SIZES  
AFTER WALL TILING  
AT HEIGHTS  
0, 100 AND 200 CM

**Y:** Recess size after tiling  
**X:** Outer tray size after tiling

## SHOWER ENCLOSURES:

After completing floor and wall tiling, measure the outer edge of the shower tray sides. The position in which the shower enclosure will be installed (A, B, C, D) must be clearly indicated on the order. These are the most frequent positions.

Attention: if you wish to specify the measurements required for the enclosure, regardless of the shower tray or the structure where the enclosure will be installed, please specify clearly on the order: “REAL MEASUREMENTS OF FINISHED ENCLOSURE”.

**A**

### STANDARD SHOWER TRAY INSTALLED ON THE FLOOR

The shower enclosure will be made smaller than the specified size.

**B**

### FLOOR-LEVEL SHOWER TRAY

The shower enclosure will be the same size or larger than the specified size, since it will be installed on the joint that divides the shower tray from the ground outside.

**C**

### INSTALLATION TO BE CARRIED OUT DIRECTLY ON THE FLOOR

The shower enclosure will be produced to be installed in an external position with respects to the slope starting line.

**D**

### INSTALLATION TO BE CARRIED OUT ON THE FLOOR WITH LOWER INNER SHOWER TRAY

The shower enclosure will be produced to be installed in an external position with respects to the shower tray.
